

Category: TCSG Menu

Item/question:

FAQ 1402: Can I send reports to a different printer from within the TCSG menu?

Solution/Answer:

You will have to enter some UNIX commands from the command line. From within the TCSG menu, you will be prompted to enter the printer name.

- Hit <<enter>> twice and you will be taken back to the TCSG main menu
- Take a 0 <<enter>> out of the menu
- If you are automatically logged out you will have to get with technical support to be able to get to the command line. These commands below must be issued from the command line. (This is only temporary because all TCSG menu items ultimately will be ported to Banner job submission.)

Report	UNIX commands	Comments
Audit Report	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 audit.lis<<enter>> menu<<enter>>	xxx is the UNIX printer name
Accounting Detail Report	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 bsrdetl.lis<<enter>> menu<<enter>>	xxx is the UNIX printer name
Check void process	Do you wish to print the report N<<enter>> cd /u02/jobsub/tmp<<enter>> ls -ltr<<enter>> qprt -Pxxx -z1 -p12 yyyy<<enter>> menu<<enter>>	Find the last vreg%%% file in the directory, use this filename - yyyy xxx is the UNIX printer name
tgrrcon	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 tgrrcon.lst<<enter>> menu<<enter>>	xxx is the UNIX printer name
tgrrcon2	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 tgrrcon2.lst<<enter>> menu<<enter>>	xxx is the UNIX printer name
Print Detail code listing - alpha	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 detailcd.lst<<enter>> menu<<enter>>	xxx is the UNIX printer name
Print Detail code listing - priority	cd \$HOME<<enter>> qprt -Pxxx -z1 -p12 detailcd2.lst<<enter>> menu<<enter>>	xxx is the UNIX printer name
