

Aircraft Structural Best Practices Sharing Webex

September 15, 2020 2:00 pm

Attendees included Steve Conway, Tal Loos, Kristy Vest, Jason Wisham, and Mike Engel

Topics:

Welcome and TCSG Updates – Steve welcomed all to the meeting. Steve explained that since June the system office has done a slow reopening for staff with most folks now being in the office 2 days a week but also spread out over which days. The state board operations have also resumed though part virtually. Presidents and VPs continue to have weekly webex meetings. Steve also mentioned the passing of Dr. Ivester the president of North Georgia Tech over the weekend.

Best Practices – Tal opened the sharing session by explaining that Savannah had been using BB Collaborate for lecture and basic classroom activities with the students over spring and summer. In June limited labs started back and things were caught up as of a few weeks ago. Mirroring industry hygiene standards and operations is key to the program's success. Savannah also makes student sign medical waivers and risk forms. Kristy and the rest of the Central GA team were using Black Board for some lecture activities and lab work also resumed in June. The 3 program locations and the DE students have presented some challenges but most of those are overcome now and fall is on track. Mike asked about IFCC meetings and the pending AST program changes. Steve stated that both of those items are on hold until further notice from TCSG leadership.

The meeting adjourned at 2:25pm.
