Attendees: Steve Conway, Roy Bramley, Devon Parks, Neil Youngblood, Eliot Bonds, Joshua Whittington, David Kuipers, Bill Underwood, Robert Hagen, and Greg Thomas.

Topics:

Welcome and sign in using chat if possible

GVTC On-going Training and Office Hours – Steve explained that the GVTC team had been doing a very aggressive training agenda for the last 3 weeks and that it would keep going. Steve would continue to send out the training schedules each week on the list serve.

Electude and Cengage links sent out – Steve explained that he had also sent out these two free resources a couple of weeks ago. Several instructors were using the Cengage product and liked it. Another was also using email to check in with students twice a week.

Other Best Practices?? I-CAR?? – Roy explained to the group that he has been using both I-CAR and 3M training modules with students. These were going quite well and he was willing to share any of these with the group. The other related topic here was handling grades. The group agreed many students would be getting Is but likely could finish up lab work summer term.

Working Students – only two instructors had working students presently but the one on internship would complete. The other working in a store may be able to get some lab credit but not all.
