

Aviation Maintenance Best Practices Sharing Webex

August 28, 2020 11:00 am

Topics:

Welcome and sign in – attendees included Steve Conway, Mike Lockaby, Clarence Willis, Leonard Small, Wayne Pace, and Tim English.

TCSG Updates - Steve welcomed all to the meeting. Steve explained that since June the system office has done a slow reopening for staff with most folks now being in the office 2 days a week but also spread out over which days. The state board operations have also resumed though part virtually. Presidents and VPs continue to have weekly webex meetings.

Best Practices – Atlanta reported that they were still working with the FAA on their program recertification process so they were not dealing with students currently. The college has also been asking about putting some course content on line though too. So far there have been no definite answers from the FAA. Augusta reported that they started a new group of 10 students and that things were going fine thus far. Tal and Jon had told Steve earlier that their programs were continuing to catch up from the spring closure, but that if things stay the course this term they will be all caught up by December. No college reported any major COVID incident thus far. All programs but Augusta are using students to sanitize labs and classrooms after class activity.

The meeting adjourned at 11:30 am
