

## **Electrical Construction Program Curriculum Development Summary Points March 28-29, 2019**

### **Attendees:**

Scott Carter, GA Northwestern; Tommy Woodall, Southern Crescent, Chad Faircloth, Southern Regional; Amy O'Dell, TCSG; Mike Howard, TCSG.

### **Welcome and Overview:**

Saundra King welcomed all attendees to the first afternoon of the curriculum development sessions. Saundra stated that the charge for each work group would be to look closely at the content edits and feedback received for each area closely and then to work on creating new curriculum which would still maintain high quality content yet be more flexible and ensure students can get to market quicker than they can at present. Each attendee was able to introduce themselves to the others and then the groups broke out into their individual rooms to work.

### **Electrical Construction Program Curriculum Development Summary**

Overall, the Electrical Construction courses and program tracks retain similar but updated content as well as contact hours. Updates made per industry feedback:

- Industry and faculty input did not recommend retaining the Basic Skills courses for the diploma.
- ELTR 1150 course added to the degree program occupational core
- Four TCC programs restructured and one new TCC created for stackable TCC's leading to diploma and degree programs.

### **Conclusion and Next Steps:**

Mike stated he would make final edits to the program and course proposals document and send back to the work group for final verification. Additional statewide industry feedback will be collected prior to sending proposals to statewide faculty through the program listserv. Faculty will have an opportunity for feedback. Once proposal has been reviewed and final edits completed, Mike would create additional documents required to be placed in the president's dropbox to be reviewed at an upcoming Presidents Council meeting. Mike would keep the work group apprised of the progress.
