

Technical College System of Georgia  
Paramedicine Best Practices Discussion  
April 13, 2020

Notes

- OEMS Survey – The state office of EMS and trauma has created a surveyMonkey to receive questions from educational programs. Responses are due by noon on 1/14/20. The state will host an educational program conference call on Wednesday to answer the questions. The survey is located at: <https://www.surveymonkey.com/r/OEMSEdQuestions>
- EMS agencies in each region have been sent a survey regarding clinical availability by state OEMS. The state will help match students to sites willing to allow students for clinical. Contact your regional training coordinator if you need assistance finding clinical locations.
- Limited labs on campus – TCSG has provided a way to allow limited labs on campus. The information has been provided to college Presidents and VPAA's. If you have not already done so, please communicate your need for on campus labs to your VPAA. The VPAA can work with you to develop a plan to submit to your college president and TCSG for approval.
- Faculty are encouraged to hold Webex or Collaborate live sessions so students can still see you "face to face" it was suggested that we may need to be creative... students can demo techniques on a pillow for example, as long as they are talking through the skill or scenario this should be valuable.
- Lab software was briefly discussed. GVTC has a list of virtual lab products that may be helpful. You can find it at <https://gvtc.tcsg.edu/deac#>
- Everyone should attend the State OEMS webex on Wednesday 4/14.
