

VPAA Webex

Wednesday, April 29, 2020 @3:00 p.m.

Welcome- Dr. Kathryn Hornsby

You can begin submitting Limited Labs requests for summer. Must still provide document Will check with Josh McKoon. Graduates are a priority, those needing to sit for licensure.

1. College Calendar Update- Kathryn Hornsby

Reviewed calendar spreadsheet. She asked that VPAA's send her exam dates if not included in submitted information. Information on spread sheet will be updated and recirculated. In addition to internal use, information goes to National Student Clearinghouse.

Robert commented that the calendar is critical because of students' access to class.

Pam highlighted the following use of calendars:

- Updates scheduled during breaks or when students not in system.
- Accurate start and end dates so that students have access when needed. Banner does not automatically update dates in Blackboard.

2. HB 444 Update- Dianne Barker

- The governor signed yesterday. Effective summer 2020.
- GFSA will meet May 1 and vote on new regulations.
- Course listings will look different. Core and CTAE listings separate. Spring (old) and summer (new) links will be available.
- Easier to sort by subject area.
- New regulations should address self-pay.
- Application – students go into site and fill out application which is valid for 1 year. Parent signs the permission form. College and high school will see information submitted. Single view available May 18.
- GFSA:
 - Webinars will begin about May 18.
 - More resources will be sent.
 - Will be critical to look for messages posted on the GFSA website. Must set up an account to access these messages.

3. Blackboard Update- Robert Keown and Pam Warren

Robert – Continue to support Colleges. Continue to negotiate with Respondus (lock down browser) for extended use past June 30. Please don't do anything with contracts until you hear back from GVTC.

Pam – Collaborate training continues for in and outside of Collaborate. Will accommodate from 1 – 500 individuals. Sessions from January 1 – March 12, there were 8,475 sessions.. From March 13 – April 28, there were 28,914 sessions.

4. Nursing Update – Sandra King

Provided update from GBON update calls this week.

5. Curriculum Database 2020 Course and Program Versions Status- Steve Conway

Kathryn - TCSG began working with Presidents' committee in February through which to move forward with programs that had been approved during the program review process. This will include vetting through IFCC's and presidents' council. Due to COVID-19 crisis, this process was suspended so that colleges could deal with crisis.

Kathryn asked VPAA's when to begin IFCC meeting for this review process – is fall 2020 a possibility? September and October will work. This will be vetted through the presidents as well. Input from advisory groups will be needed.

Steve - Does not recommend deleting 2020 courses in KMS. Suggest compromise in which AA team will unlock the 2020 courses which are currently visible to make them not show up in the search tool in KMS. The group agreed to this plan.

6. Cosmetology- Kathryn Hornsby/Anthony Gallman

Anthony touched base with the Georgia Board of Cosmetology regarding questions that have been received:

- Demonstration video (by faculty) can be continued through summer term via online learning.
- Per Georgia Board of Cosmetology, faculty cannot virtually observe students performing work. Students must perform face to face. Legislative change will be needed for that change to occur, and the Board is not receptive to making that request.
- Recommend use of mannequin. Mannequin can be used in place of live people for credit. Will make social distancing easier to achieve in labs.
- Question from Amy Holloway: Dual Enrollment. Shampoo tech. students trying to complete high school pathway. Anthony will check on specifics and get back to the group.

7. Other Questions- All

Meeting adjourned at 3:47 p.m.
