### TICKET INFORMATION:

The CA51: Clinic Assistant TCC is an institutionally developed program belonging to Southern Regional Technical College. According to the college's request, ALHS 1011: Structure and Function of the Human Body was added to the program. The college request for this change is based on the U.S. Bureau of Labor Statistic of phlebotomist employment growth. To allow financial assistance for students enrolled in this program and provide additional skills within the field, the college has decided to add the ALHS 1011 course. Adding this course allows the program to meet the minimum Pell eligibility. The credit hours for this TCC has increased from 11 to 16 total credit hours, resulting in a 202112 version of the program. The program will require further review and approval at the March 2021 State Board.
