#### **DISCUSSION SUMMARY:**

L. Whitlock suggested that the Physics standards be reevaluated and rewritten. The standards seem to be too specific and written for use with a specific textbook. Her suggestion was to make the standards less specific

- There was a question about how our standards compare to those of USG. Discussion ensued about the USG standards being hard to find. That they are broader, and open to interpretation.
- A. Gavel, J. Stout and L. Whitlock agreed to work together reevaluating the standards.
- Dr. Dames reminded the committee to keep any articulation agreements in mind when making any changes.
- Some members felt that the standards are fine as is and do not need to be changed. The standards reflect what is taught in classes.

2. Next meeting will be scheduled to take place in late Spring.
