

# TCSG Regional Roundtable

Randy Smith RN, MS, BSN, NEA-BC  
COO/CNO

South Georgia Medical Center  
Valdosta, Georgia

# Innovative Strategies Addressing Education Issues

- Apprenticeship Program
- LPN to RN bridge program
- Nurse residency program

# Collaboration To Address Nurse Faculty Shortage

- Support the development of nurse faculty through scholarships and professional development opportunities
- Stipends to nurses who wish to pursue graduate level preparation as clinical instructors and nurse educators
- Expand nursing preceptor programs in hospitals

# Expand Nursing Pipeline

- Increase nursing scholarships
- High school outreach programs
- Nurse Ambassador programs
- Increase clinical rotations, adjunct faculty, and clinical instructor support

# Future of Nursing Education

- Keep pace with practice innovations and other changes in the healthcare delivery system
  - Continuously evaluate and revise education curricula, approaches, and programs used to educate new and practicing nurses
- Simulation centers
- Expand Nurse residency Programs
  - Continuum of education, training and practice
- Joint Faculty positions

# Future of Nursing Education

- Addressing SDOH
- Increase diversity and equity
  - Nurses from underrepresented or disadvantaged backgrounds are more likely to serve in medically and economically under-resourced communities
  - Having similar racial and ethnic backgrounds or languages may improve communication and trust between nurses and patients, leading and improved outcomes

# Future of Nursing Education

- Continue the development of competency-based models of education and valid tools that accurately measure competency
- Incorporation of technology, including artificial intelligence, in nursing education and practice
- Alternative methods to classroom
